

ENZYMATIC LAUNDRY
(bio-surfactant)
BY HAND AND IN THE WASHING MACHINE

FIELDS OF USE

New conception detergent for washing in cold water or at low temperature of all types of fabrics: colored, white, black, cotton, hemp, linen, silk, wool, delicates, acrylics, etc.

ADVANTAGES

Thanks to its special stain remover formula it is effective on over 100 types of stains: hydrolyzes proteins by breaking them into smaller fragments that are easily eliminated. It helps to maintain the degree of whiteness, thanks to the anti-redepositing activity it carries out during washing. Prevents wool felting and fiber shrinkage maintaining the original shape and elasticity of the garments. It also retains the liveliness and the brilliance of colors.

ENZYMATIC LAUNDRY reduces washing times by providing a considerable saving of energy necessary for heating the water in the tank, it leaves no residue toxic on the garments, moreover thanks to its delicate action in the washing phase, you will have garments sanitized, without the colors being altered in the least.

The use is totally safe, both for the operator and for all types of garments, colored and not, since ENZYMATIC LAUNDRY does not attack fibers, does not attack colors and attacks dirt.

ENZYMATIC LAUNDRY gives us the total certainty of the absence of greasy, dry dirt or mixed and the use of AMMORBI 'in the rinsing phase guarantees the absence of limescale residues on the garments thanks to the special substances that soften the water.

ENZYMATIC LAUNDRY is not irritating to hands, it is instantly soluble with little foaming for effective rinsing without excessive water consumption. The delicate scent remains persistent in the garments.
