

## HIDRO ENZIM

### USES

Water pollution and disgusting stench in the immediate vicinity of the pits oxidation and sedimentation of the fields of waste are mainly due to the sulphide of hydrogen produced by the decomposition of organic waste materials.

HIDRO Enzim and made up of living organisms that thrive at the expense of this hydrogen sulfide, eliminate it rapidly consuming. Moreover, HIDRO Enzim and used with excellent results for the treatment of all the sewage systems or removal of sewage where the organic sediments form a problem as wells, drains, septic systems, disposal pits or fields of drainage, restaurants, commercial buildings, apartment buildings, plant food processing, hospitals, schools, hospices, zoos, etc ..

### DIRECTIONS FOR USE

#### A. deodorizing

A.1 To deodorize all resources used for the collection and transportation of waste, diluting HIDRO Enzim with equal amount of warm water (not above 49 ° C) and spray thoroughly. Possibly let react during the night before rinsing.

A.2 To deodorize bathrooms, closets, indoors, etc. add 15/20 cc of product to a liter of neutral detergent. Rinse thoroughly after treatment.

#### B. To remove the occlusion of the pipes of the ways of disposal of waste.

B.1 General Add HIDRO Enzim directly in the exhaust nozzle or well shut-in period of lower use of the plant followed by a small amount of water lukewarm. (If the water was too hot, or were present products and chlorinated disinfectants that destroy living organisms, these should be eliminated through drain before administering HIDRO Enzim).
