

DRAW-NET I

ALKALINE DETERGENT WITH QUATERNARY AMMONIUM SALTS FOR THE FOOD INDUSTRY

USES

milk processing, cheese, eggs, meat processing, poultry and fish. Bottled mineral water, wine, beer, fruit juices, distilleries. Industry preserves of vegetables. Food industry in general.

DRAW-NET I is a compounds indicated for the use on equipment in the food industry, thanks to its special formula is not aggressive on any type of metal (machinery and equipment commonly located within the food business can present in their structure several metal alloys).

DRAW-NET I acts in complete safety on commonly used metals, without requiring a change of the product when it is used on cranks or aluminum surfaces, copper, bronze, brass or galvanized (zinc), anodized (aluminums), such as evaporators, air condensers, packaging plants and so on. **DRAW-NET I** do not corrode metals, paints

DRAW-NET I is in compliance with the law 155/97 " Hygiene Law."

ADVANTAGES

DRAW-NET I is a highly effective blend of penetrating agents, wetting agents and detergents with Quaternary Ammonium Salts that attack the molecular structure of the dirt without damaging the surface itself . It destroys the adhesive properties of the dirt binders and simultaneously cleans the surfaces.

- **DRAW-NET I** is biodegradable and does not contribute to water pollution.
- **DRAW-NET I** is not flammable under any circumstances.

SUGGESTIONS FOR USE

Apply **DRAW NET I** in solution from 5% to 20% depending on the heaviness of the dirt, leave it to penetrate for a few minutes, then rinse

FEATURES COD. 51D73 / 3

Type: Alkaline with hygienic water based

Color: Straw

Flammability Not flammable

Toxicity Low, do not digest

Composition: A blend of biodegradable surfactants and stabilized alkali modified with quaternary ammonium salts, with no free caustics.
