

## DESCALE GREEN

### USES

DESCALE GREEN is used in the food industry, dairy, milking machines (recirculating system).

DESCALE GREEN is a very effective and fast descaler. It attacks with quickly the stratifications of undesirable substances, removes most difficult and layered dirt.

### ADVANTAGES

- Twice efficient

DESCALE GREEN is twice effective than the raw acid, and has twice its power. It penetrates deep into pores to eliminate the dirt and scale.

- Economic

DESCALE GREEN is effective when it is diluted, it can be used from 1 to 4% in water (according to the quantity of incrustations). Its exceptional cleaning power saves on cleaning costs and labor.

### SUGGESTIONS FOR USE

General instructions:

Carefully read all instructions and warnings before using DESCAL GREEN. Do not use on aluminum, magnesium, zinc (and galvanized). Prior to treatment, always perform a test on the surface to be treated and adjust the concentration.

Use DESCAL GREEN always with gloves and splash proof protection.

### INSTRUCTIONS:

Dilute DESCAL GREEN both for recirculation systems that for external uses from 1% up to 4% in water.

In outdoor applications, abundantly wet with this solution the surface to be treated. Scrub with a brush and rinse the dirt, grease and stratified accumulations of food, from calcification and different dirt.

### FEATURES
