

## **DRAW-NET**

**HIGH PERFORMANCE ALKALINE DETERGENT.  
FOR FOOD SYSTEM, TO RENEW IN SAFETY WITHOUT CAUSE  
DAMAGES ON VARIOUS SURFACES: METALLIC, SYNTHETIC, PAINTED,  
IN CEMENT OR IN RUBBER.**

### **USE**

**DRAW-NET** is used to clean and to renew the surfaces in the plants of the food-system from oil, grease and every kind of oily. Thanks to his special formulation **DRAW-NET** is not aggressive on metal, floors, machineries and various equipments normally used in the plants of the food-system.

The equipments can be made from different metallic alloy, **DRAW-NET** take action in safety on the normally used metallic surfaces, without changing the detergent action when you use it on aluminium, galvanized surfaces, and so on.

**DRAW-NET** is in compliancy with the standard fixed from the Law 155/97 (European Community) "Hygiene Law".

### **BENEFITS**

- **DRAW-NET** break-up the dirt, the coating, the stratification of dirt. **DRAW-NET** is an effective blend of penetrating agents, wetting agents and synthetic detergents that attack the molecular structure of dirt, of the coatings, of the grease stratification, the grease spots. It does its action without damaging the surfaces. The particles of dirt are emulsified and is much more easy to remove the dirt with the rinse out.
- **DRAW-NET** is biodegradable, and don't contribute to the water-pollution.
- **DRAW-NET** is flameproof and is not toxic for people or domestic animals
- **DRAW-NET** doesn't corrode the metallic equipments because it contains a strong inhibitory agent that avoid the metallic corrosion on iron, stainless steel, aluminium, zinc, and so on. This materials are attached by the rust and by oxidization when treated with aggressive detergents. It doesn't happen with **DRAW-NET**

### **USE SUGGESTIONS**

Make a solution with **DRAW NET** (20%) and water.

Apply the solution with a sprayer on the surfaces to clean, leave the solution penetrating for a short time, rinse out with abundant water. You can use **DRAW-NET** in a more concentrated solution in case of grease or heavy residues.

## PRECAUTIONS

Before using **DRAW-NET** on the finishes of a truck used to transport food, it is recommended to run a full test on a small part of the surface to be cleaned. The finishing of modern trucks, differ from one brand to another and some of them can be sensitive to this type of solvent. It is advised to clean the vehicle in the shade keeping it covered. Carefully wet the part to be cleaned up to cool it before applying **DRAW-NET** diluted. Do not let the solution dry on the finish, but immediately rinse after washing.

## PECULIARITIES: COD. 51D73

Kind of product	Alkaline Emulsifying Agent water-based.
Colour	Pale yellow
pH	11-13
Inflammability	Flameproof
Toxicity	Light toxicity. Don't swallow.
Composition	A stabilized mixer of surfactants and biodegradable agents and modified alkali without free caustic agents.
